1 PROBLEM

Without expanding the determinant, prove that

$$\begin{vmatrix} a & a^2 & bc \\ b & b^2 & ca \\ c & c^2 & ab \end{vmatrix} = \begin{vmatrix} 1 & a^2 & a^3 \\ 1 & b^2 & b^3 \\ 1 & c^2 & b^3 \end{vmatrix} \tag{1.0.1}$$

2 PROPERTIES OF DETERMINANTS

Properties required for solving this problem:
Property.1: If all the elements of row/column are multiplied by a scalar then the value of new determinant is equal to multiplying the old determinant by that scalar.
Property.2: If any two rows/columns are exchanged then the sign of determinant changes.

3 SOLUTION

Proceeding to the solution by taking the left hand side matrix of (1.0.1) and applying properties of determinants.

$$\begin{vmatrix} a & a^2 & bc \\ b & b^2 & ca \\ c & c^2 & ab \end{vmatrix} \tag{3.0.1}$$

Using **Property.1** performing the following operations:
Multiplying and dividing by **a**

$$\begin{vmatrix} a & a^2 & bc \\ b & b^2 & ca \\ c & c^2 & ab \end{vmatrix} = \frac{1}{a}\begin{vmatrix} a^2 & a^3 & abc \\ b & b^2 & ca \\ c & c^2 & ab \end{vmatrix} \tag{3.0.2}$$

Multiplying and dividing by **b**

$$\begin{vmatrix} a^2 & a^3 & abc \\ b & b^2 & ca \\ c & c^2 & ab \end{vmatrix} = \frac{1}{ab}\begin{vmatrix} a^2 & a^3 & abc \\ b^2 & b^3 & abc \\ c & c^2 & ab \end{vmatrix} \tag{3.0.3}$$

Multiplying and dividing by **c**

$$\begin{vmatrix} a^2 & a^3 & abc \\ b^2 & b^3 & abc \\ c & c^2 & ab \end{vmatrix} = \frac{1}{abc}\begin{vmatrix} a^2 & a^3 & abc \\ b^2 & b^3 & abc \\ c^2 & c^3 & abc \end{vmatrix} \tag{3.0.4}$$

As the last column has similar elements,

$$\frac{abc}{abc}\begin{vmatrix} a^2 & a^3 & 1 \\ b^2 & b^3 & 1 \\ c^2 & c^3 & 1 \end{vmatrix} = \begin{vmatrix} a^2 & a^3 & 1 \\ b^2 & b^3 & 1 \\ c^2 & c^3 & 1 \end{vmatrix} \tag{3.0.5}$$

Applying **Property.2** on (3.0.5):

$$\begin{vmatrix} a^2 & a^3 & 1 \\ b^2 & b^3 & 1 \\ c^2 & c^3 & 1 \end{vmatrix} \xleftrightarrow{C_2 \to C_3} - \begin{vmatrix} a^2 & 1 & a^3 \\ b^2 & 1 & b^3 \\ c^2 & 1 & c^3 \end{vmatrix} \xleftrightarrow{C_1 \to C_2} \begin{vmatrix} 1 & a^2 & a^3 \\ 1 & b^2 & b^3 \\ 1 & c^2 & c^3 \end{vmatrix} \tag{3.0.6}$$

The above determinant is equal to right hand side determinant of equation (1.0.1).
Hence proved:

$$\begin{vmatrix} a & a^2 & bc \\ b & b^2 & ca \\ c & c^2 & ab \end{vmatrix} = \begin{vmatrix} 1 & a^2 & a^3 \\ 1 & b^2 & b^3 \\ 1 & c^2 & b^3 \end{vmatrix}$$
